

X-SURVEILLANCE

INTRUSION DETECTION & EVIDENCE.

INTELLIGENT CELLULAR INTRUSION SURVEILLANCE.

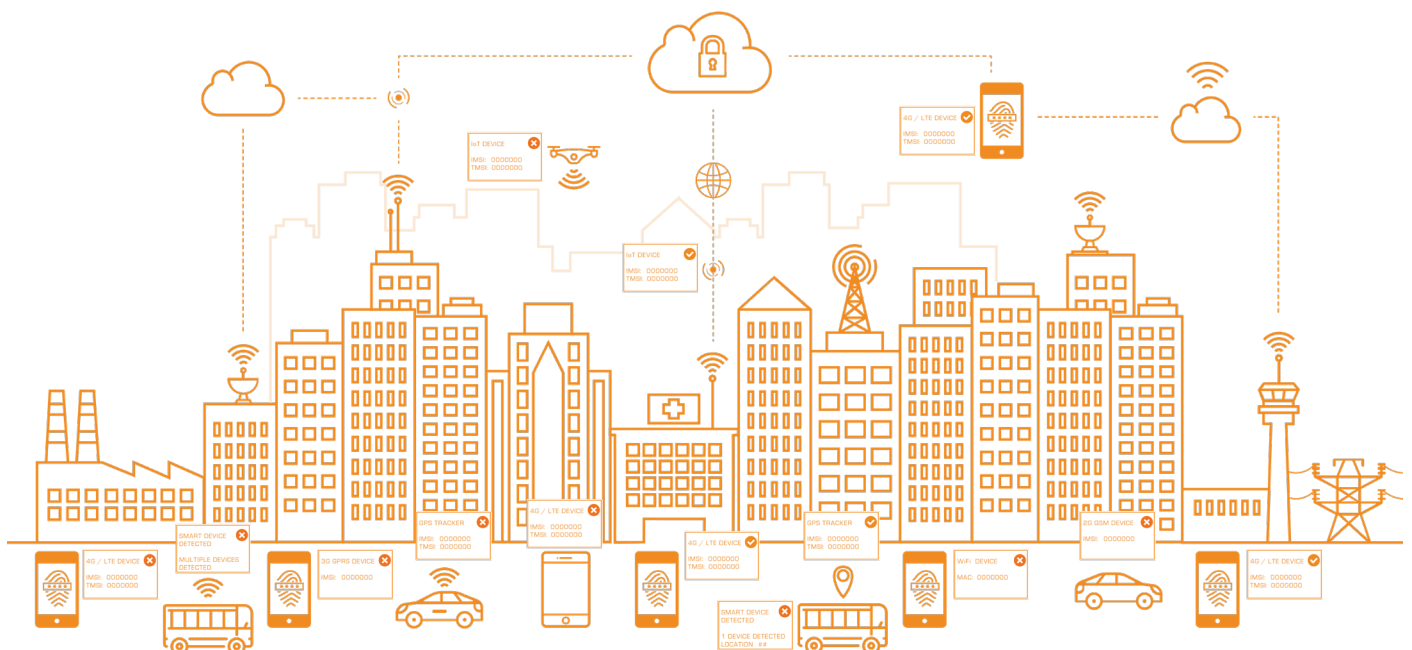

Remotely - Monitor • Scan • Detect • Identify • Locate • Track • Trace - cellular devices.

Detecting and tracing wireless devices using cellular identity.

Receive accurately the location and identity of each individual and multiple devices.

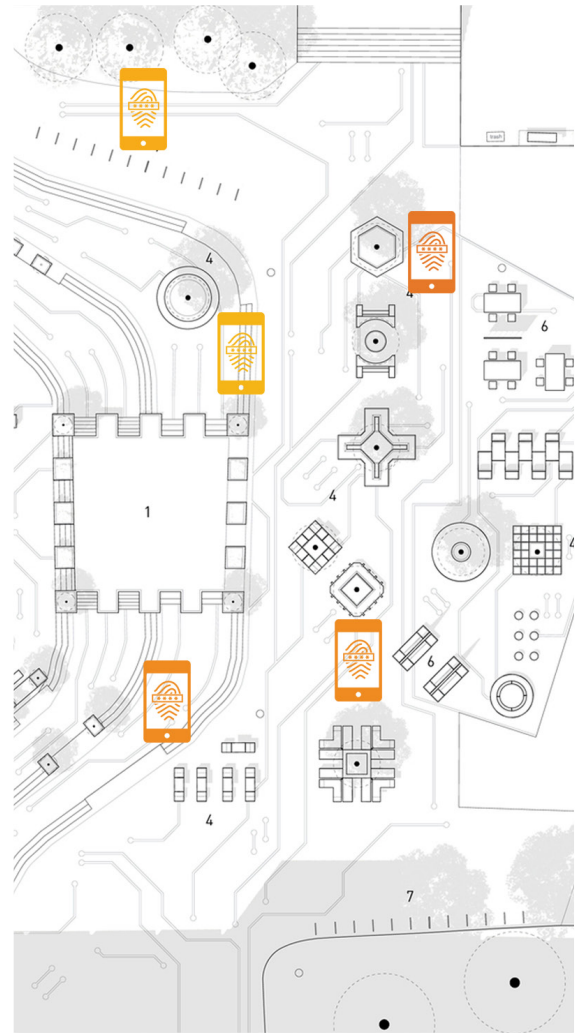

- Unique real-time IoT detection
- Geofencing perimeter security
- Improve safety conditions
- Secure area protection
- Increase situational awareness
- Real-time intruder surveillance
- White- & blacklist AI technique
- Rapid identity & access control

UNIQUE IoT & MOBILE INTRUSION DETECTION

All in One solution. Unique cellular detection!
Capturing 4G, 3G, 2G and WiFi identities.

- High security compound protection
- Real-time precise intrusion detection
- Wireless perimeter intrusion monitoring
- Locked down (sensitive) facility protection
- Powerful secure meeting room protection
- Outside regular hours access identification
- Strict smartphone use (safety) policy
- Vehicle & person entrance detection
- Rapid VIP access and border control
- Contact us for more possibilities.

Most trespassers, infiltrators and criminal devices where difficult to detect and identify. Access control and safety checks where time consuming. Safeguarding R&D developments and sensitive operations where costly and laborious.

Not anymore!

Each wireless device has a unique digital fingerprint. Now a days everyone carries at least one (4G LTE) wireless device.

Capture identities to strengthen evidence using X-SURVEILLANCE wireless device detection.
